LAB OBSERVATION

EXPERIMENT-11

11) Design a wireframe for a mobile application that incorporates security measures using Figma

Answer)

Aim

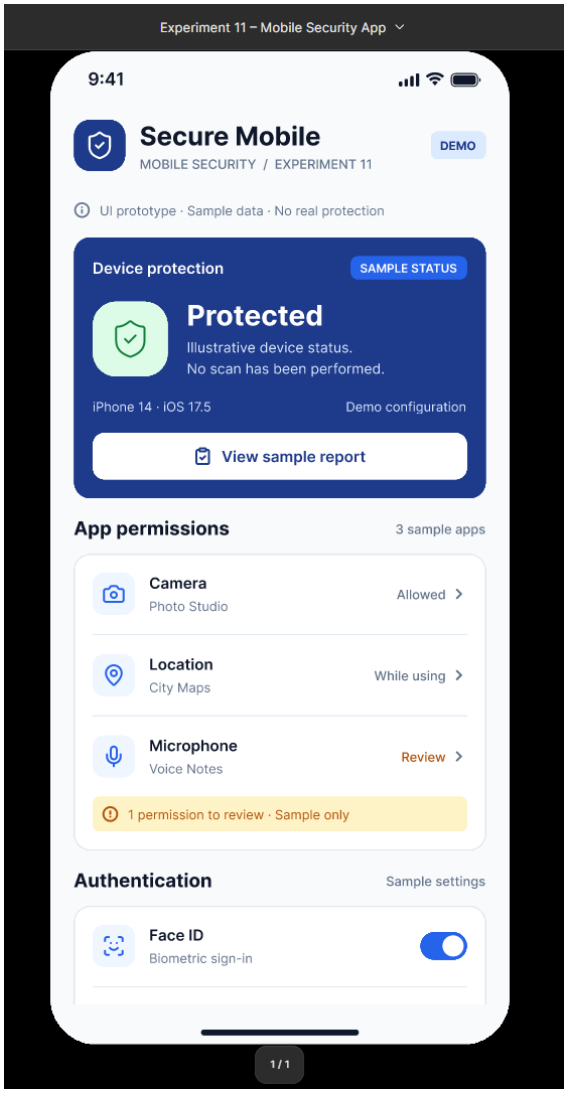

To design a wireframe for a mobile application that incorporates security measures using Figma.

Procedure

1. Open Figma.
2. Create a new design file.
3. Select a suitable mobile phone frame.
4. Fill in the required content for the mobile security application.
5. Design visual elements using appropriate shapes, colors, icons, and text.
6. Make the interface interactive where required.
7. Add annotations and explanations for the security features.
8. Incorporate multimedia elements where appropriate.
9. Create a storyboard animation if required.
10. Review and edit the prototype.
11. Save and share the completed design.

Output

A mobile application wireframe incorporating security measures was successfully designed using Figma. The interface includes device protection status, security score, app protection, authentication, permission management, security alerts, recent security activity, and navigation options.

Result

Hence, a wireframe for a mobile application incorporating security measures was successfully designed using Figma.
