LAB OBSERVATION

EXPERIMENT-12

12) Use Figma to create an interactive diagram illustrating the evolution from 1G to 5G

Answer)

Aim:

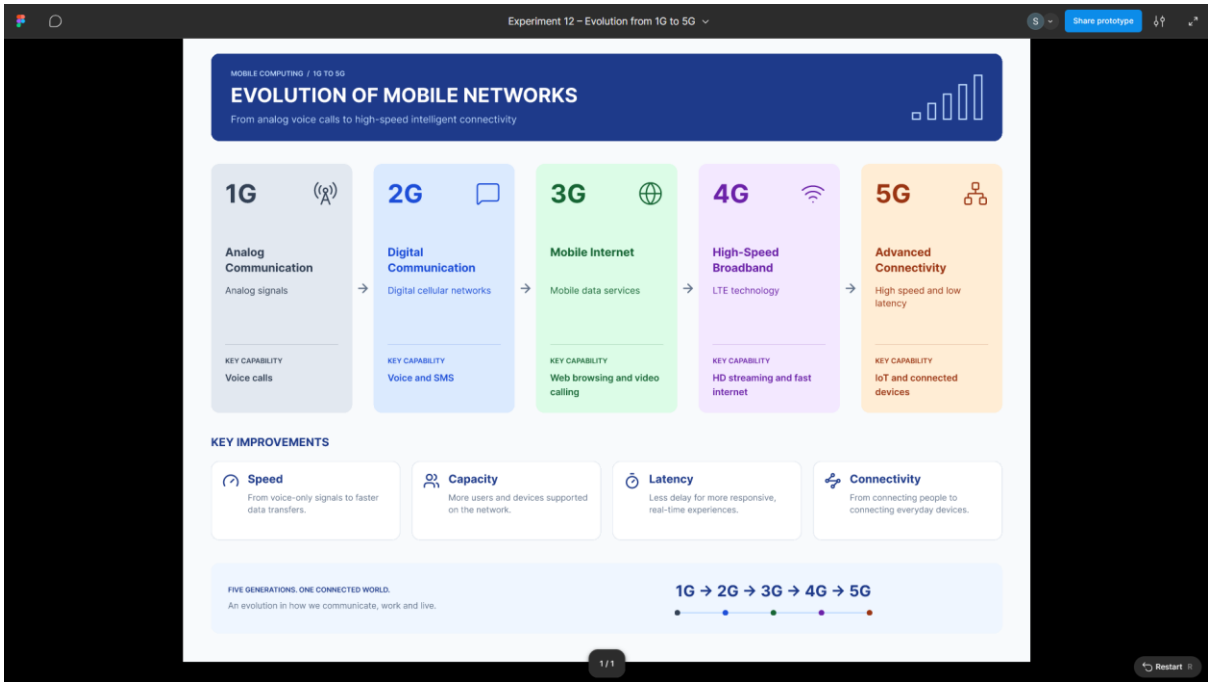

To create an interactive diagram in Figma illustrating the evolution of mobile networks from 1G to 5G.

Procedure:

1. Open Figma.
2. Create a new design file.
3. Select a suitable frame for the infographic.
4. Add the required content about the evolution of mobile networks from 1G to 5G.
5. Design visual elements using appropriate shapes, colors, icons, and text.
6. Connect the five generations using arrows to represent their chronological evolution.
7. Add annotations and explanations describing the key features of each generation.
8. Include visual elements to highlight improvements in speed, capacity, latency, and connectivity.
9. Review and edit the prototype to ensure clarity and proper alignment.
10. Save and share the completed design.

Output:

An infographic illustrating the evolution of mobile networks from 1G to 5G was created using Figma, highlighting the technologies and key capabilities of each generation.

Result:

Hence, a visual representation illustrating the evolution of mobile networks from 1G to 5G was successfully created using Figma.
