LAB OBSERVATION

EXPERIMENT-13

13) Design an infographic in Figma comparing mobile communication and mobile computing

Answer)

Aim:

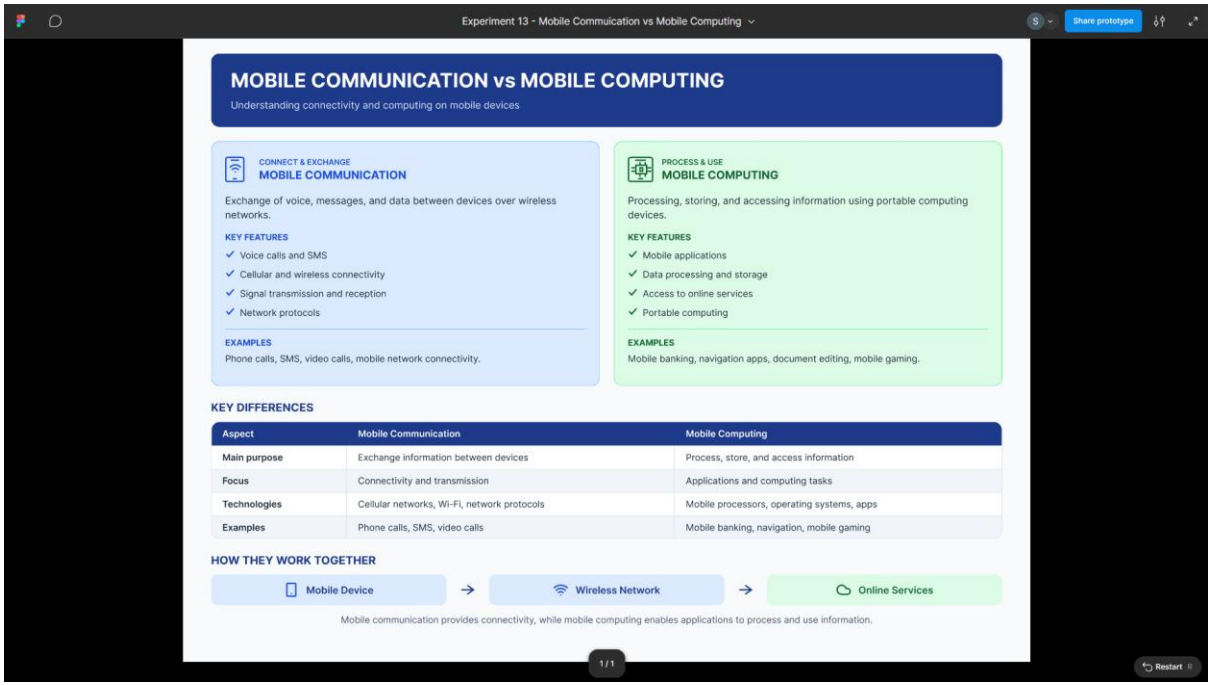

To design an infographic in Figma comparing mobile communication and mobile computing, highlighting their definitions, key features, technologies, applications, and differences.

Procedure:

1. Open Figma and create a new design file.
2. Create a frame of size 1200 × 900 pixels.
3. Add the title “Mobile Communication vs Mobile Computing” with a suitable subtitle.
4. Create two separate sections for Mobile Communication and Mobile Computing.
5. Add definitions, key features, and examples to each section.
6. Create a comparison table showing the differences in purpose, focus, technologies, and applications.
7. Add a simple diagram illustrating how mobile devices connect to wireless networks and online services.
8. Apply suitable colors, icons, fonts, and spacing to make the infographic clear and attractive.
9. Review the design, correct any alignment or formatting issues, and save the Figma file.

Output:

An infographic comparing mobile communication and mobile computing, displaying their definitions, features, examples, key differences, and relationship through a visual diagram.

Result:

The infographic comparing mobile communication and mobile computing was successfully designed in Figma, clearly illustrating their features, differences, and applications.
