LAB OBSERVATION

EXPERIMENT-10

10) Create a visual representation in Figma showcasing the differences between various multiple access techniques.

Answer)

Aim:

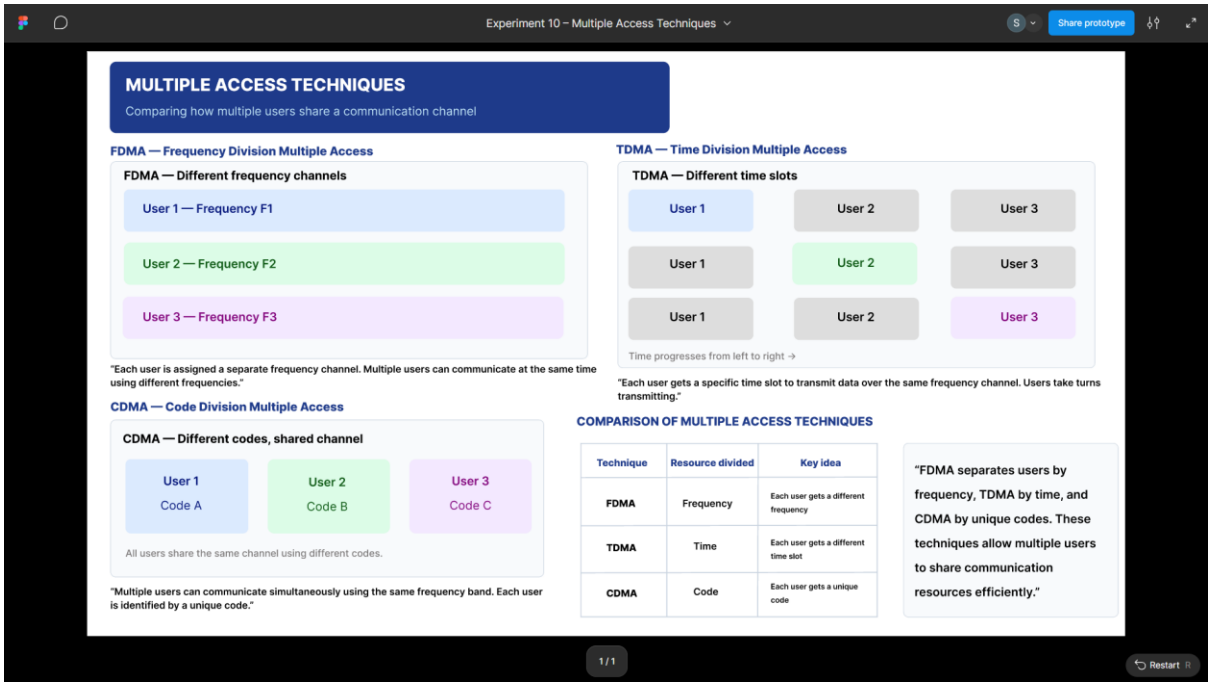

To create a visual representation using Figma showcasing the differences between various multiple access techniques.

Procedure:

1. Open Figma and create a new design file.
2. Select a suitable frame for the infographic.
3. Add a title and subtitle describing multiple access techniques.
4. Create a diagram representing FDMA using separate frequency channels for different users.
5. Create a diagram representing TDMA using different time slots for multiple users.
6. Create a diagram representing CDMA using unique codes for different users sharing the same channel.
7. Use appropriate shapes, colors, labels, and text to distinguish the techniques.
8. Create a comparison table highlighting the key differences between FDMA, TDMA, and CDMA.
9. Add a conclusion summarizing the three techniques.
10. Review the design and save the completed infographic.

Output:

A visual infographic comparing FDMA, TDMA, and CDMA was successfully created using Figma.

Result:

Hence, a visual representation showcasing the differences between various multiple access techniques was successfully created using Figma.
